

picresize - <http://picresize.com>

picresize is a free tool that allows you to crop photos, resize photos by custom pixel size and save photo formatting.

1. Drag and Drop or Select Desired Photo from Computer
2. Crop/Rotate Desired Photo
3. Resize your Photo. (For your photo gallery we recommend 1000 x 1000 pixels)
4. Save your Photo in Desired Format (we recommend file size be 100 to 150 Kilobytes)

1 Crop and Rotate Your Picture: (Optional)

The preview below is not the actual size of your image and is used for cropping only.

Crop Menu

Click and drag on the image to make selection. Hold *Shift* for square. ➔

Crop Selection

Deselect

Revert to Original
