You can create new pages and add them under the main categories of your site. This creates a dropdown.

Keep in mind, you MUST contact us before changing anything on the main menu navigation, because it changes the way the menu may look. Since your site is a little more custom with mega menus, please call if you have any issues.

To add drop downs, hover over "appearance" and select "menus." Drag and drop order. Click "save menu" once done.

A page must be created before adding it to the menu.
